*Repair of curb and gutter sections*

EEL has provided design and construction services for the Village's last six Motor Fuel Tax (MFT) programs.

EEL's responsibilities have included performing topographic surveys; analyzing pavement core and soil boring reports; preparing plans, specifications and bid documents; ensuring construction was completed in accordance with plans and specifications; and obtaining any necessary permits.

Project activities were coordinated with the Village and communicated with local residents and business affected by construction.

*Section of deteriorated pavement*

*Pavement construction*
